Intelligent Business Management

Did you know that energy represents as much as thirty percent of a building's operating costs? Undertaking energy efficient measures can reduce consumption, and thus your bills, by thirty percent or more.

That's about \$25,000 per year for every 50,000 square feet of office space.

Ready to add those **savings to your bottom line?**

Organizations that implement energy-efficient measures outperform their competitors by as much as 10%. To remain profitable and gain a competitive edge, companies need to develop an energy efficiency program. Companies need to make energy efficiency an essential part of their business plan.

(Our mission)

Improve the delivery of energy efficiency information and services by independently measuring and reporting on energy performance.

Simply put, we help businesses be more energy efficient without going in the **red**.

(How we can assist)

- Assess current state of energy activities and market exposures
- Develop a comprehensive roadmap to increase/manage energy efficiency
 - Prioritize list of initiatives that will realize desired energy savings
 - Reduced carbon footprint
 - Detail rebate, tax and emissions incentives
 - Measure return on investment
